RORI SOLUTIONS LIMITED COMPANY

Product:

- Design, Fabricate & Assembly Rack, Jig, Production Line
- Fabricate Air, Paint, Chemical Filter
- Surface Treatment Coating Tool - Equipment - Material - Chemical
- Contributor Material - Tool - Equipment In Industrial Field

Our partner

Filter Media

Pre Filter Media

The pre filter media is designed as pre-filtration or primary filtration for general ventilation equipment and air control system with heavy pollution. The filter is $\geq 5\mu\text{m}$ particles and foreign matters, with large dust capacity, small resistance, economical and practical, and simple structure

Flame retardant Ceiling filter media

Flame retardant filter media is imported flame retardant fiber, step by step encryption, increasing structure, carding network hot air fusion produced. It is mainly used for pre-filtration of air filter equipment in strict working environment and air ventilation equipment.

Ceiling filter

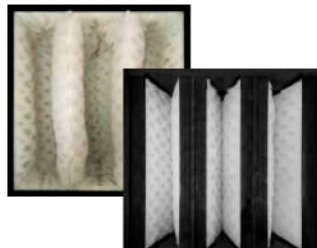

Ceiling filter (Roof filter) is mainly used in automotive coating, high-tech electronics, military aerospace and other leading industries. After special viscous treatment, dust particles cannot pass through the medium because the adhesive penetrates completely, so that the fully filtered air diffuses evenly, forming a laminar flow state and achieving the best spraying effect.

Fiberglass Filter(Paint stop filter)

Glass fiber filter also known as floor filter, paint stop filter, paint aresstor, using long glass fiber in a non-fabric way, gradually made of dense structure, large air permeability, small air resistance. It is mainly used in paint mist discharge filtration or industrial oil mist discharge filtration of coating system, and can also be used in general ventilation pre-filtration.

DPA paint mist filter media

DPA mist filter media is used to filter and capture overspray liquid or powder coatings in the paint industry. DPA paint mist filter media for small paint mist over 10 microns capture efficiency up to 99.8%. In European and American countries, DPA mist filter media has been widely used in dry spray room.

Multi-layer paint filter paper

Using the principle of the influence of air pressure on the airflow: when the paint in the spray room or the paint room flows to the mesh filter paper under the action of air pressure, the filter paper will be affected by the air pressure, blocking the flow of the paint fog, so as to effectively absorb the paint and dust in the air. Is the dry spray chamber must use filter material, its role is in the spray painting operations to intercept flying paint fog, control air pollution, safety and environmental protection.

V-shaped paint filter paper

V-type paint filter paper, also known as paint filter paper, paint mist filter paper, is the special spray booth filter paper. A new environmental protection product used in dry spray booth, it makes spray oil/paint no longer water, no longer pollution. Filter the solid or liquid particles in the air stream and equalize the flow.

Air filter

V shape compact filter

Product introduction · V shape compact filter are widely used for intermediate or terminal filtration of commercial and industrial ventilation and air conditioning systems due to their unique mechanis

Glass fiber pocket filter

The glass fiber pocket filter is made of a special very fine glass fiber with a fire rating of ul-900class-2, ideal for fire certification enterprises. The glass fiber bag filter is the main filter for commercial and industrial ventilation and air-conditioning systems, and the pre-filter for clean room ventilation and air-conditioning systems

Paper frame HEPA Filter

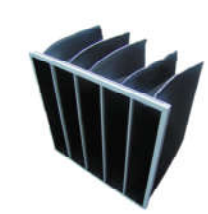

The paper frame high efficiency filter is mainly used for collecting particle dust and various suspended solids above 0.3 m.

BUNDLING

Strapping tapes for bundling and palletizing feature a very high tensile strength, tear resistance, and good adhesion to many different substrates

ABRASION-RESISTANT TAPES

Tesa ® 51032

Adhesive tapes particularly resilient to abrasion and wear for short- and long-term bundling applications

CLOTH TAPES

Adhesive tapes for bundling applications that require a higher degree of holding power.

Tesa ® 4621

Tesa ® 4671

Tesa ® 4651

FILAMENT TAPES

Adhesive filament and strapping tapes with reinforced backings that render heavy duty strapping and bundling performance. Strong and flexible holding power you can rely on.

Filmic tape offers holding power with flexibility for moving or shifting parts.

FILMIC TAPES

GLUES & CLEANERS

High-quality spray adhesives suitable for use on a wide range of materials as well as cleaners for surface preparation and removing residues

NON-WOVEN TAPES

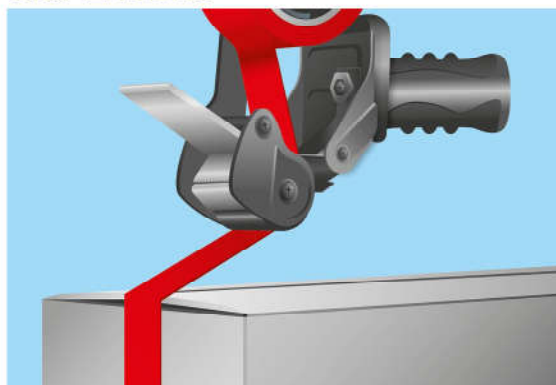

Non-woven tapes are typically used for cable or wire harnessing applications

Tesa ® 51623
 Tesa ® 51628
 Tesa ® 51608

DISPENSERS

Dispensers help to optimize processes and make tape handling easier. We offer a variety of manual, semi-automatic, and fully automatic dispensers for adhesive tapes.

FUNCTIONAL TAPES

ANTI-SLIP TAPES

Anti-slip tapes are the ideal way to protect against and prevent slips on surfaces such as stairs, ramps, mobile homes and trailers, and in other work areas.

BARRIER & WARNING TAPES

Marking tapes and hazard warning tapes identify temporary hazard and can be used for lane or area demarcation where a robust tape is required.

DAMPING TAPES

Adhesive tapes specifically designed to minimize movement and reduce vibration or rattling noises in a variety of applications

ELECTRICALLY CONDUCTIVE TAPES

Electrically conductive tapes provide grounding and shielding characteristics and are easy to integrate in manufacturing processes.

GRIP TAPES

Tapes with a silicone rubber coating are highly resistant to "sticky" substances yet provides a reliable "non-slip" effect on smooth substrates.

INSULATION TAPES

Tapes to be used to insulate electrical wires and other materials that conduct electricity

MARKING & IDENTIFICATION LABELS

The perfect solution for permanently tamper-evident marking or coding items. These labels are designed to work with laser engraving machines

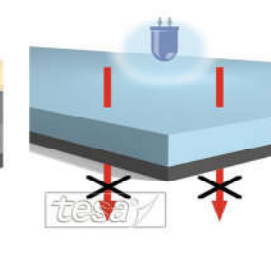

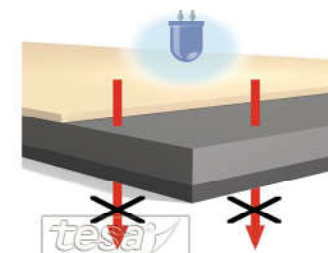

OPTICALLY CLEAR TAPES

Optically clear tapes are ideal for applications that utilize clear or opaque materials that need to be bonded or temporarily secured.

LIGHT BLOCKING TAPES

Minimize the effects of light when the application calls for controlled lighting.

SHIELDING TAPES

Encapsulation of sensitive organic and printed electronic devices to prevent oxidation and vapour penetration

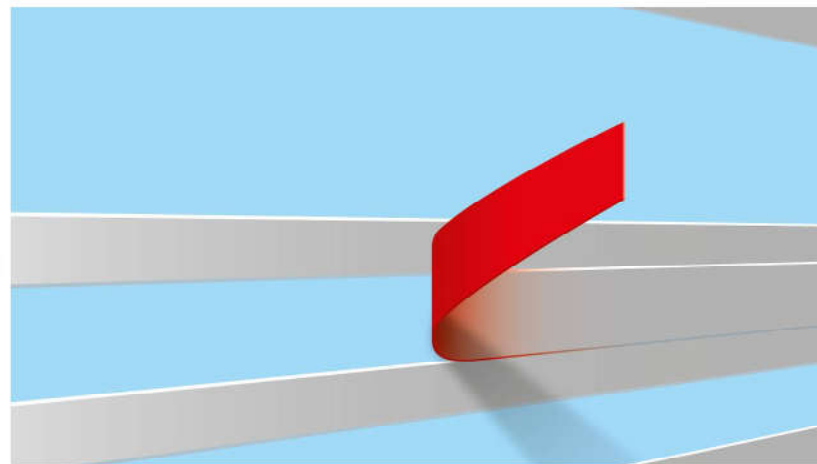

HIGH PERFORMANCE BONDING

Tesa © ACXplus is a high performing acrylic core tape for permanent interior and exterior bonding and mounting applications. The high bond tape offers you new dimensions for aesthetical pleasant and secure and fast and constructive bonds.

MASKING

Masking tapes are essential for painting and provide perfect, sharp edges – easy to use and removable without residue even from delicate surfaces, both indoors and outdoors

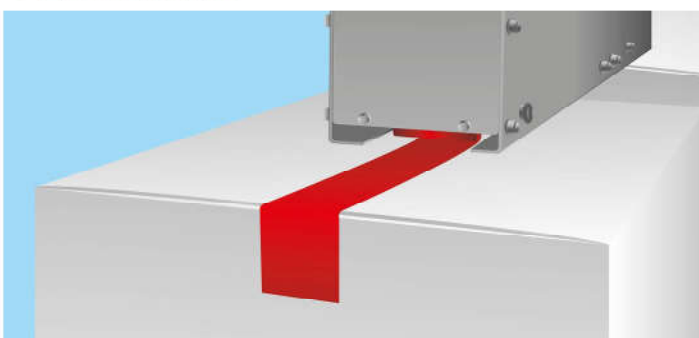

Due to their high and long-lasting adhesive strength, double-sided tapes allow objects to be quickly and easily fixed to a wide range of different surfaces.

REPAIR

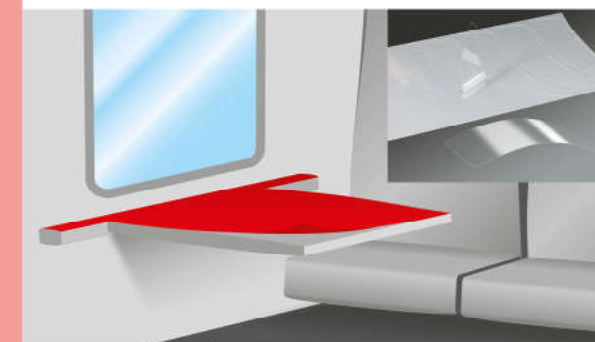

Repairing tapes offer "first aid" in emergency situations, allowing minor damages to be fixed with little effort. These tapes are ideal for fast and reliable repairs.

SPLICING

Splicing tapes help to significantly optimise processes by ensuring rolls can be joined during operation without the risk of tearing or slowing the process down.

SURFACE PROTECTION

Surface protection tapes are designed to protect surfaces from damage due to abrasions, debris, environmental elements, and more.

SAFETY & PROTECTION TAPES

Whether you want to implement safety measures in your space or produce personal protection and medical equipment, when health and safety is your top priority, we have adhesive solutions you can trust.

PROTECTIVE COATING

JAPAN TECHNOLOGY

DETERGENT FOR STONE

ACRON AB

Remove of dirt, tar, smear, and the other stains (such as beer, soy sauce, coffee, etc) on the surface of all types of stone.
Remove of urine stains and dirt on stone of toilet.
For daily or periodic cleaning of stone floor

BLUTO

Application:
Remove silicone coatings effectively.
Remove of stubborn grease & soils.

DA VINCI

Remove silicone coatings effectively.
Remove of grease & soils.

COLUMBAN(Acid type)

For slippery flooring materials such as granite, ceramic tile, terrazzo etc.
For slippery flooring materials on the swimming pool side, bathroom, entrance of building, stairs, etc.

F-COAT

Prevention of reattachment of the dirt.
Easy to remove dirt even if it stained.
- Stainless steel, Tile, Aluminum, Enamel, FRP, Hard plastic, Ceramics such as washstand, Toilet stool.

IMPALAS

Remove of efflorescence and scale from hot springs.
Remove of water scale and dirt on stone surface.

KABISUKE

Removes mildew on woods, bathroom walls, tile joints

OLIVE

Remove of dirt such as the exhaust gas which stuck to exterior walls.
Remove of soap scum & sebum on bathroom floor and wall.

PICASSO

Remove of rust, water scale and dirt on tile, granite and exterior walls.

Rori Solutions Limited Company

Website www.rorisc.com

Email: contact@rorisc.com

SABIKESU(Viscous Type)

Suitable for removes of rust on structural steel, stainless steel, etc. (non immersible in liquid.)

SOFTER

Pre-and after-treatment with acid detergents such as PICASSO, IMPALAS, COLUMBAN, SABIKESU, etc.

TORRES

Remove of rust, yellowing, and dirt without etching stone surface.
Removes rust and dirt on aluminum, stainless steel, brass, copper, etc.
Removes rust on the painted metallic substrates.
Removes iron powder and rust on the body of vehicles and motorbikes, and aluminum wheels.

PROTECTANT FOR STONE

ARISTON

Protection and Prevention of granite, marble, terrazzo, tile and cement from stains and dirt.

Once applied on the surface of stone, ARISTON penetrates into material deeply forming an outstanding weather-resistant and water-proof layer by chemical reaction. Excellent oil-repellency prevents stains and soiling from gathering on the surface, and daily maintenance only requires washing off with water. Prevents water absorption by lowering the absorption rate, and prevent cracking from freezing. Fine weather ability enables prevention form weathering, deteriorating, and efflorescence of stone.

CRESTON

Protection and Prevention of Limestone, Sandstone, Towada-stone, Ohya-stone, Terracotta tile, Unglazed tile, Brick, Concrete and other stones from stains and dirt.

METALKING

Protection and Prevention for metal, FRP from stains and dirt.

GALILEO

Protection for granite, marble, imitation stone, tile and sanitary ware from stains and dirt.

NEWTON

Protection and Prevention of granite, marble, terrazzo, tile and cement from stains and dirt.
