# RORI SOLUTIONS LIMITED COMPANY

### **Product:**

- Design, Febricate &And Assembly Rack, Jig, Production Line
- Febricate Air, Paint, Chemical Filter
- Surface Treatment Coating Tool Equipment Material Chemical
- Contributor Material Tool Equipment In Industrial Field

### Our partner

### **Air Cleaning Tech Solutions Provider**

#### Filter Media

#### Pre Filter Media

The pre filter media is designed as pre-filtration or primary filtration for general ventilation equipment and air control system with heavy pollution. The filter is ≥ 5µm particles and foreign is mainly used for pre-filtration of matters, with large dust capacity, small resistance economical and practical, and simple structure

retardant Ceiling filter Flame filter media

Flame retardant filter media is imported flame retardant fiber, step by step encryption, structure, carding increasing network hot air fusion produced. It air filter equipment in strict working environment and air ventilation equipment.

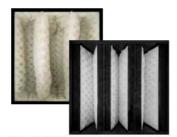

Ceiling filter (Roof filter) is mainly used in automotive coating, military high-tech electronics. aerospace and other leading industries. After special viscous treatment, dust particles cannot pass through the medium because the adhesive penetrates completely, so that the fully filtered air diffuses evenly, forming a laminar flow state and achieving the best spraying effect

#### **Fiberglass** Filter( Paint stop filter)

Glass fiber filter also known as floor filter, paint stop filter, paint aresstor, using long glass fiber in a non-fabric way, gradually made of dense structure, large air permeability, small air resistance. It is mainly used in paint mist discharge filtration or industrial oil mist discharge filtration of coating system, and can also be used in general ventilation pre-filtration.

#### DPA paint mist filter Multi-layer paint media

99.8%. In European and American countries, DPA mist filter media has been widely used in dry spray room.

## filter paper

DPA mist filter media is used to Using the principle of the influence of air pressure on the airflow: filter and capture overspray liquid when the paint in the spray room or the paint room flows to the mesh or powder coatings in the paint filter paper under the action of air pressure, the filter paper will be industry. DPA paint mist filter affected by the air pressure, blocking the flow of the paint fog, so as to media for small paint mist over 10 effectively absorb the paint and dust in the air. Is the dry spray microns capture efficiency up to chamber must use filter material, its role is in the spray painting operations to intercept flying paint fog, control air pollution, safety and environmental protection.

#### V-shaped paint filter paper

V-type paint filter paper, also known as paint filter paper, paint mist filter paper, is the special spray booth filter paper. A new environmental protection product used in dry spray booth, it makes spray oil/paint no longer water, no longer pollution. Filter the solid or liquid particles in the air stream and equalize the flow.

#### Air filter

#### V shape compact Glass fiber pocket filter

Product introduction · V shape compact filter are widely used for intermediate or terminal filtration of commercial and industrial ventilation and air conditioning systems due to their unique mechanis

## filter

ul-900class-2, ideal for fire certification enterprises. The glass fiber bag filter is the main filter for commercial and industrial ventilation and air-conditioning systems, and the pre-filter for clean room ventilation and air-conditioning systems

#### Paper frame HEPA Filter

The glass fiber pocket filter is made of a special The paper frame high efficiency filter is mainly used very fine glass fiber with a fire rating of for collecting particle dust and various suspended solids above 0.3 m.

#### BUNDLING

#### **ABRASION-RESISTANT TAPES**

Adhesive tapes particularly resilient to abrasion and wear for short- and long-term bundling applications

Tesa ® 51032

#### **FILAMENT TAPES**

Adhesive filament and strapping tapes with reinforced backings that render heavy duty strapping and bundling performance. Strong and flexible holding power you can rely on.

Filmic tape offers holding power with FILMIC TAPES flexibility for moving or shifting parts.

Tesa ® 4621

Strapping tapes for bundling and

palletizing feature a very high tensile strength, tear resistance, and good

adhesion to many different substrates

Adhesive tapes for bundling applications that require

Tesa ® 4671

High-quality spray adhesives suitable for use on a

wide range of materials as well as cleaners for

surface preparation and removing residues

a higher degree of holding power.

**GLUES & CLEANERS** 

Dispensers help to optimize

processes and make tape handling easier. We offer a of

semi-automatic, and fully automatic dispensers for

manual.

Tesa ® 4651

#### **NON-WOVEN TAPES**

Non-woven tapes are typically used for cable or wire harnessing applications

Tesa ® 51623 Tesa ® 51628 Tesa ® 51608 Tesa ® 51616 Tesa ® 51616 ID Tesa ® 51618

#### **DISPENSERS**

variety

adhesive tapes.

### **FUNCTIONAL TAPES**

#### **ANTI-SLIP TAPES**

Anti-slip tapes are the ideal way to protect against and prevent slips on surfaces such as stairs, ramps, mobile homes and trailers, and in other work areas.

#### **BARRIER & WARNING TAPES**

Marking tapes and hazard warning tapes identify temporary hazard and can be used for lane or area demarcation where a robust tape is required.

#### **ELECTRICALLY CONDUCTIVE TAPES**

Electrically conductive tapes provide grounding and shielding characteristics and are easy to integrate in manufacturing processes.

#### **INSULATION TAPES**

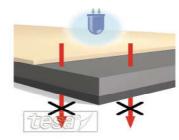

Tapes to be used to insulate electrical wires and other materials that conduct electricity

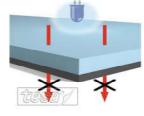

#### LIGHT BLOCKING TAPES

Minimize the effects of light when the application calls for controlled lighting.

#### **DAMPING TAPES**

Adhesive tapes specifically designed to minimize movement and reduce vibration or rattling noises in a variety of applications

**Rori Solutions Limited Company** 

Website: www.rorisc.com Email: contact@rorisc.com

#### **GRIP TAPES**

Tapes with a silicone rubber coating are highly resistant to "sticky" substances yet provides a reliable "non-slip" effect on smooth substrates.

#### MARKING **LABELS**

The perfect solution for permanently tamper-evident marking or coding items. These labels are designed to work with laser engraving machines

IDENTIFICATION

#### **OPTICALLY CLEAR TAPES**

Optically clear tapes are ideal for applications that utilize clear or opaque materials that need to be bonded or temporarily secured.

&

Encapsulation of sensitive organic and printed electronic devices to prevent oxidation and vapour penetration

#### HIGH PERFORMANCE BONDING

Tesa ® ACXplus is a high performing acrylic core tape for permanent interior and exterior bonding and mounting applications. The high bond tape offers you new dimensions for aesthetical pleasant and secure and fast and constructive bonds.

#### MASKING

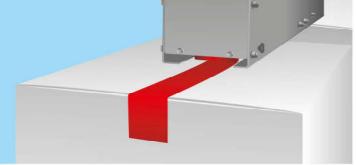

Masking tapes are essential for painting and provide perfect, sharp edges - easy to use and removable without residue even from delicate surfaces, both indoors and outdoors

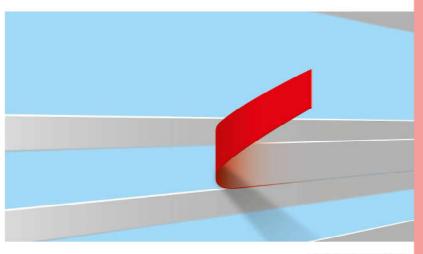

Due to their high and long-lasting adhesive strength, double-sided tapes allow objects to be quickly and easily fixed to a wide range of different surfaces.

# **PACKAGING**

#### **MOUNTING**

#### Rori Solutions Limited Company

Website: www.rorisc.com Email: contact@rorisc.com

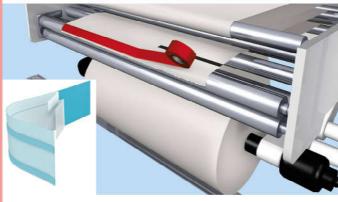

#### REPAIR

Repairing tapes offer "first aid" in emergency situations, allowing minor damages to be fixed with little effort. These tapes are ideal for fast and reliable repairs.

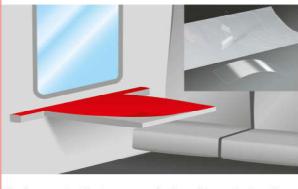

#### SPLICING

Splicing tapes help to significantly optimise processes by ensuring rolls can be joined during operation without the risk of tearing or slowing the process down.

#### SURFACE PROTECTION

Surface protection tapes are designed to protect surfaces from damage due to abrasions, debris, environmental elements, and more.

#### **SAFETY & PROTECTION TAPES**

Whether you want to implement safety measures in your space or produce personal protection and medical equipment, when health and safety is your top priority, we have adhesive solutions you can trust.

### **PROTECTIVE COATING**

#### **DETERGENT FOR STONE**

**ACRON AB** 

Remove of dirt, tar, smear, and the other stains (such as beer, soy sauce, coffee, etc) on the surface of all types of stone.

Remove of urine stains and dirt on stone of toilet. For daily or periodic cleaning of stone floor

**BLUTO** 

Application: Remove silicone coatings effectively. Remove of stubborn grease & soils.

silicone Remove effectively. Remove of grease & soils.

For slippery flooring materials such as granite, ceramic tile, terrazzo etc. For slippery flooring materials on the swimming pool side, bathroom, entrance of building, stairs, etc.

Removes mildew on bathroom walls, tile joints

Prevention of reattachment of the

Easy to remove dirt even if it stained.

- Stainless steel, Tile, Aluminum, Enamel, FRP, Hard plastic, Ceramics such as washstand, Toilet stool.

Remove of dirt such as the exhaust gas which stuck to exterior walls. Remove of soap scum & sebum on bathroom floor and wall.

Remove of efflorescence and scale from hot springs. Remove of water scale and dirt on stone surface.

Remove of rust, water scale and dirt on tile granite and exterior walls.

# **Rori Solutions Limited Company**

Suitable for removes of rust on structural steel, stainless steel, etc. (non immersible in liquid.)

Pre-and after-treatment with acid detergents such as PICASSO, IMPALAS, COLUMBAN, SABIKESU,

Once applied on the surface of stone,

ARISTON penetrates into material deeply forming an outstanding weather-resistant and water-proof

Excellent oil-repellency prevents stains and soiling from gathering on the surface, and daily maintenance only requires washing off with water.

Prevents water absorption by

lowering the absorption rate, and

Fine weather ability enables prevention form weathering,

deteriorating, and efflorescence of

prevent cracking from freezing.

stone.

layer by chemical reaction.

Remove of rust, yellowing, and dirt without etching stone surface. Removes rust and dirt on aluminum. stainless steel, brass, copper, etc. Removes rust on the painted metallic

substrates.

Removes iron powder and rust on the body of vehicles and motorbikes, and aluminum wheels

#### PROTECTANT FOR STONE

ARISTON

Protection and Prevention of granite, marble, terrazzo, tile and cement from stains and dirt.

Protection and Prevention of Limestone Sandstone, Towada-stone, Ohya-stone, Terracotta tile, Unglazed tile, Brick, Concrete and other stones from stains and dirt.

FRP from stains and dirt.

Protection and Prevention of granite, marble, terrazzo, tile and cement from stains and dirt.

### **GALILEO**

Protection for granite, marble, imitation stone, tile and sanitary ware from stains and dirt.
